# 文字だけで分かりづらい汗

Part 1

1 In 1859, a samurai was visiting Yokohama. It was a special place. It was one of the few ports in Japan open to foreign trade. A lot of foreigners came there.  
 2 That samurai was good at speaking Dutch. That was the most popular foreign language in Japan then. In Yokohama, he tried to talk with foreigners. But he had a lot of difficulty. Nobody understood him. He wrote, "In Yokohama, foreigners did not understand me at all. I also could not read signs. Then I realized that they were English words."

3 He discovered something surprising. Almost all Europeans there spoke English. He thought he had to learn it, and he wanted to learn it. The samurai was Fukuzawa Yukichi.

Part 2

4 At first he found English difficult. However, he was eager to learn it, so he did two things. First, he asked some friends to study English with him. He thought he could learn better with his friends. One samurai, Eitoku Kume, got interested in learning. They started to study together. Second, he tried to find "teachers." When he heard that someone could speak English, he went to meet them. He learned how to pronounce words from them. He practiced again and again. At last he became good at English.

5 One day, he heard that the ship *Kankamaru* was going to the US. It was the first official Japanese visit. He was able to get on it. He was really excited.

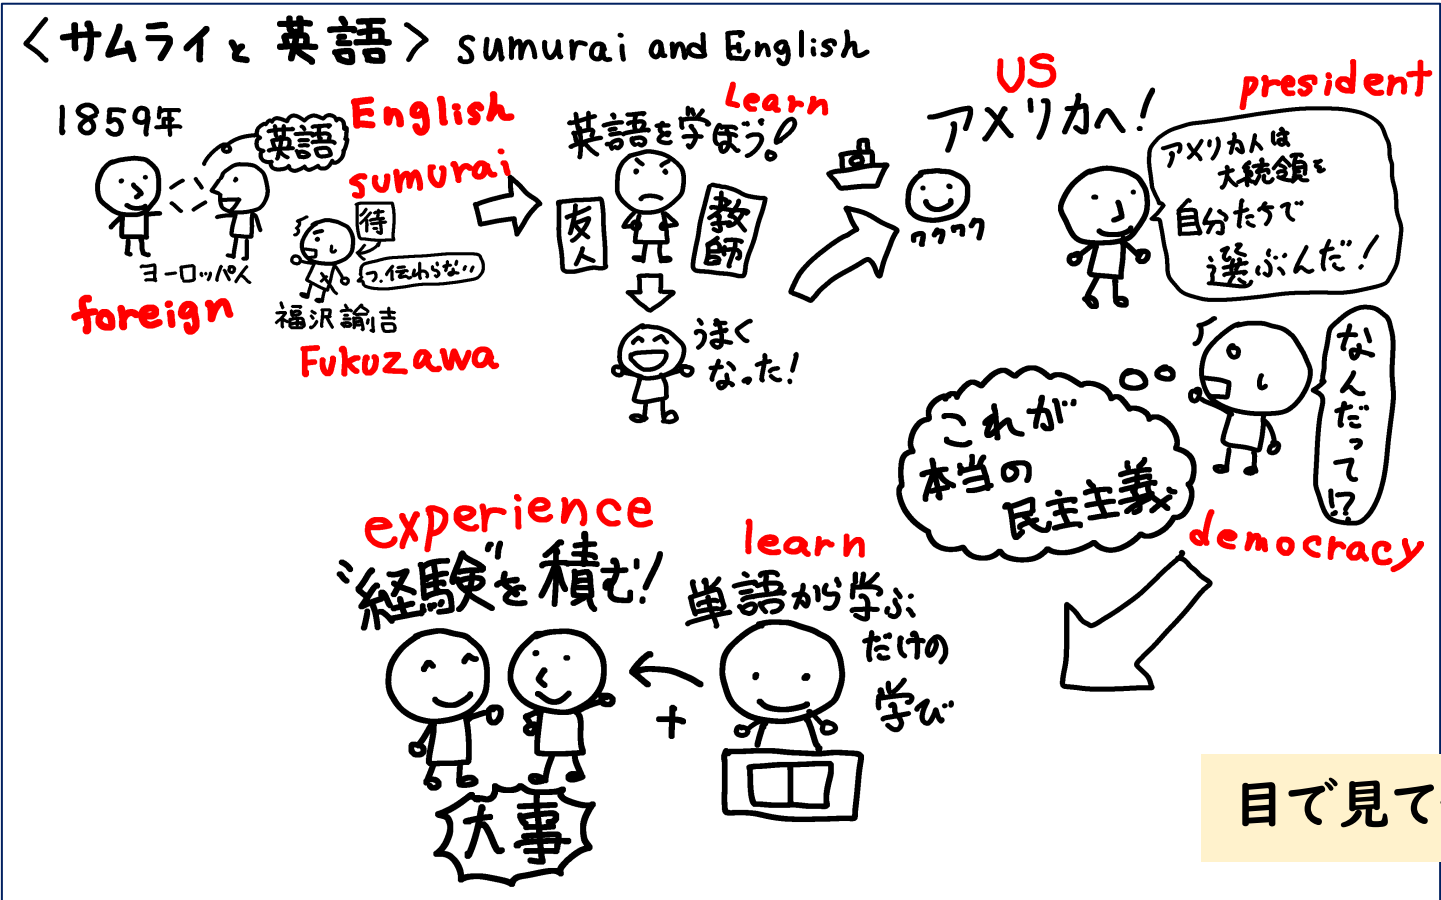

Part 3

6 Fukuzawa came to the US. Everything was new and fascinating. One day, he asked someone about George Washington's descendants. The man said, "I don't know. But I heard that one of his descendants married someone."  
 7 Fukuzawa was surprised. He thought George Washington was like Fukuzawa's Zenshu. In Japan, the shogun's position was hereditary. Everybody knew about their descendants. On the other hand, Americans chose their president by themselves. After his term was up, most people didn't know about his descendants. Fukuzawa already knew the word "democracy." However, he understood its real meaning through this experience.

Part 4

8 Fukuzawa wrote, "It is not good to learn only from words. Language is a tool. It is like a hammer when you build a house." He also said, "You can learn better through experience." When you need to know a language, you can learn a lot from books. However, it is not enough. He believed you also need experiences.

9 A lot of samurai studied English hard. They read English books. They learned a lot from them, but they learned the real meaning of things through their experiences. With this knowledge, they led Japan into the next era.  
 10 After more than a hundred years, we are still studying English. How are you studying it? We can learn a lot from the correct way of learning English.
